

Advance solution for stabilizing your packages

Anti-slip Sheets are imperative palletizing accessories that stabilize your products on pallets during internal conveying, transport and storage of your merchandise.

It is a perfect solution to stabilize any kind of package. An anti-slip sheet would prevent your product from slippage during handling and transportation. It is used as a complement to stretch film for securing your loads on the pallet until they reach your customers.

How it works on your shipments?

It's a paper like material coated with special adhesives on both sides to create an anti-slip surface. These sheets are placed in between layers of goods. It provides better interlocking characteristics between stacked items which holds your package safely and securely from sliding and shifting. The product remains intact while in storage or during the shipments. The slide angle of our product is $\leq 45^\circ$, i.e. product do not slip and fall even when pallet's are tilted to an angle of 45° .

What are the benefits?

- ✓ Cost-Effective and reduces stretch film usage
- ✓ Reduce product damage and accidents
- ✓ Significant reductions in material handling costs
- ✓ Increase stability of your pallets
- ✓ High non-slip properties
- ✓ Environmental Friendly- leaves no residue, biodegradable, non-toxic and recyclable
- ✓ Work effort is minimized
- ✓ Easy to place during operation (automatically or manual)

AGT Product

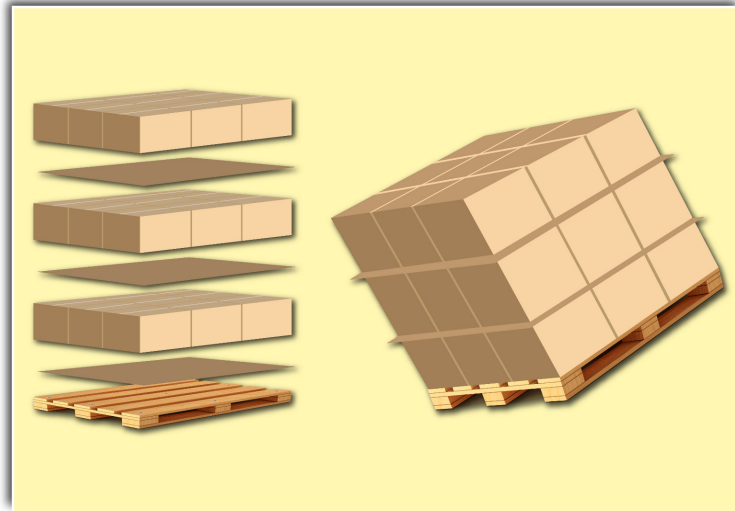

Our products are 100 % customized to customers requirement and sizes, depending on the application we suggest and produce these anti slip sheets locally. Our expertise allows us to define the quality of anti-slip sheet best adapted to your needs based on your pallet patterns that stresses on your products.

AGT Grades

We produce the following specs in any size as per customers requirement,

- AGT KL – 140
Virgin Paper
- AGT KL – 175
Virgin Paper
- AGT TL – 140
100 % Recycled
- AGT TL – 175
100 % Recycled

We want to help you to reduce your packaging cost, optimizing your pallet loading patterns or increase the number of rows of products per pallet shipped.

Contact us to reach out our representative to discuss how our product can meet your expectation.
